EXPERIENCE

Smartest Algeria Remote, Algeria
Full-Stack Developer *Oct 2022 – Oct 2026*

- Tasked with digitizing complex business workflows for B2B clients, built end-to-end features in Angular, React and TypeScript on Node.js/NestJS services, shipping 5 production applications used daily by 300+ staff across client companies.
- Facing fragmented logins across products, implemented Keycloak SSO with OAuth 2.0/OIDC, role-based access control and token-secured APIs, unifying authentication across 4 applications and cutting access-related support requests by ~30%.
- Audited the frontend codebase to find duplicated and inconsistent UI components, then consolidated them into a shared library of 30+ reusable components, reducing duplicate UI code by ~30% and speeding up new screen delivery by ~25%.
- Inherited legacy modules with heavy technical debt; refactored them toward Clean Architecture and added unit tests, raising test coverage on core modules from near zero to ~50% and making releases safer.
- Diagnosed slow reporting screens and optimized PostgreSQL and MongoDB queries through indexing and query rewrites, cutting response times by ~50% on the heaviest endpoints.
- Brought LLM-powered features into business apps, including document summarization, smart search and form auto-fill through LLM APIs, reducing manual data-entry time by ~25% for operations teams.
- Built and consumed REST and GraphQL APIs integrating internal services with 5+ third-party systems such as payment, SMS and email providers, and containerized services with Docker in CI/CD pipelines for repeatable deployments.
- Raised team code quality by leading code reviews, defining coding standards and mentoring 2 junior developers within Agile/Scrum sprints alongside product, design and QA.

Tebessa Innoest Tebessa, Algeria
Mobile & Web Developer *Jan 2020 – Jan 2022*

- Supported young founders in a start-up incubator by turning their ideas into working products, delivering 6+ MVPs across mobile and web for incubated projects.
- Built cross-platform mobile apps with React Native (iOS and Android from one codebase), covering authentication, REST API integration, push notifications and offline-friendly screens.
- Developed responsive React websites and landing pages that gave start-ups a professional launch presence for pitches, demo days and investor meetings.
- Advised project leaders on technical scope and feature priority, helping them ship lean first versions in 4–8 week cycles.

PROJECTS

UniPath AI — RAG Admissions Assistant GitHub
Python, LangChain, LangGraph, ChromaDB, Streamlit

- AI agent that answers UK university and pathway-program questions for Algerian students, grounded in a curated knowledge base of course, fee and entry-requirement pages.
- LangGraph agent with retrieval and fee-comparison tools, cited answers, and an evaluation script scoring 100% (10/10) answer accuracy on a test question set, plus a pytest suite.

SecureMCP — Keycloak-Secured MCP Server GitHub
TypeScript, MCP SDK, Keycloak, SQLite, Docker

- Model Context Protocol server that lets AI agents query and update business data, with every tool call authorized by a Keycloak-issued JWT.
- Role-based tool access (viewer vs. admin) and audit logging of agent actions; runs with one Docker Compose command, with a Vitest suite running in GitHub Actions CI.

EDUCATION

Badji Mokhtar University Annaba, Algeria
Master of Science in Artificial Intelligence *Dec 2020 – Jul 2022*

- Relevant coursework: Machine Learning, Deep Learning, Neural Networks, Design Patterns, Agile Methodologies

Bachelor's Degree in Computer Science *Sep 2017 – Oct 2020*

- Relevant coursework: Algorithms, Data Structures, Object-Oriented Programming, Web Development

SKILLS & LANGUAGES

AI & ML: LLMs, RAG, AI Agents, LangChain, LangGraph, Model Context Protocol (MCP), Vector Databases (pgvector), Prompt Engineering, Machine Learning, Deep Learning
Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3/Sass
Frontend: Angular, React, React Native, Redux, Vue.js, Tailwind CSS, Component Libraries
Backend & APIs: Node.js, NestJS, Express.js, FastAPI, REST, GraphQL, Microservices
Auth & Security: Keycloak, OAuth 2.0, OpenID Connect, JWT, SSO, RBAC
Databases: PostgreSQL, MongoDB, Data Modeling, Query Optimization
DevOps & Practices: Docker, CI/CD, Git, Linux, Clean Architecture, Unit Testing, Code Review, Agile/Scrum
Spoken languages: Arabic (Native), English (Full Professional), French (Limited Working)
